

New Product Release FS1 Friction Fit mini post for frameless glass fencing

Clear Glass Solutions are proud to introduce our new FS1 friction fit mini post.

Specifications:

Material SS316

Finish: Satin or Polished

Raised profile Dress Collar. Apart from superior aesthetics, the holes no longer need to be cleaned out to make the dress collar sit correctly. This saves you time and money from an installation perspective

Fully Integrated friction fit clamping system. No separate pressure plate or shims to fit

Designed for 12mm toughened glass only! The gap is 12.5mm so is a perfect fit with no unsightly gaps.

No holes or glass drilling required

Applications: Frameless glass fencing /balustrading

Availability: Only through Clear Glass Solutions or one of our preferred contractors.

Clear Glass Solutions listen to our clients and following this feed back , we have spent considerable time and resources developing our new FS1 mini post.

The FS1 is available now and has been engineered to AS1926. If you are looking for a mini post that is aesthetically pleasing, is strong, versatile and exclusive to restricted clients, then this is the spigot for you.

Top Mounting capability: The FS1 has a separate base plate that can be used in situations where core drilling is not possible. The gap under the glass is less then 100mm so is ideal for balustrade applications

The FS1 has extension capability so that you can core through thick pavers to find structural concrete. This truly is a perfect mini post for all applications.
