SOLUTIONS
THE CHOICE IS CLEAR

Power Glass

Clear Glass Solutions is pleased to offer a new glass product to the market.

Power Electric glass has a white opaque appearance providing privacy where required. When an electric current is run through the glass, the glass becomes totally clear. Power glass provides for privacy and unobstructed views. The variety of uses for a product such as this is many and varied.

Imagine the unobscured view of the ocean, mountain range or city where the view is yours to behold. But when you want privacy, the flick of a switch turns the glass white and you have total privacy.

Maybe you have a room that doubles as a home theater room. Turn off your clear electric glass window and you have an opaque projector screen. The same principle applies to an office or meeting room. You can have clear glass when it is required or a private meeting space. Turn on your projector and project your PowerPoint's straight onto the glass.

Bedrooms no longer need curtains. Even internal walls can become clear when needed.

Night clubs, coffee lounges and restaurants can take advantage of Chameleon power glass. The possibilities are endless.

clearglass
SOLUTIONS
THE CHOICE IS CLEAR
